

Weakness

Can't run code directly

Sometimes overexplains simple things

▲

🎲 SUMMARY

Use Case	Claude Code	ChatGPT with Code Tools
Writing and reading code	✅ Best for reading/editing large files	✅ Also excellent
Debugging and explaining code	✅ Strong reasoning and clarity	✅ More tools (runs, charts, etc.)
Running simulations/math	❌ Not available	✅ Can compute, plot, analyze
Overall coding experience	● Clean, focused, tuned	● Powerful, multi-tool environment

Let me know if you'd like:

- A comparison with **GitHub Copilot**
- Help picking which to use for a specific project
- A sample problem solved in both tools for comparison

I'm happy to go deeper.
